The transition to secondary education in Tel Aviv-Yafo is upon the entry to middle school (junior high), in the seventh grade. During November, sixth graders attending municipal schools receive a text message with their placement for the next school year. The placement is determined by the educational space to which the elementary school they study belongs to.

In the next school year (2023-2024), 27 schools will operate in the city: six-year schools and three/four-year schools.

Students wishing to apply for another placement or those required to perform other registration processes (changing into another educational stream, external studies, etc.) may do so as specified on this page.
